PROFILE

I'm a junior Web developer with a degree in computer engineering and hands-on freelance experience. My passion for technology drives me to learn quickly and work hard. I enjoy solving complex problems and turning them into practical solutions. Even though I don't too much experience, I've worked on many projects independently and with teams. I'm excited about new challenges and eager to apply my skills in a collaborative environment. My goal is to contribute effectively to projects and grow as a developer.

EDUCATION

Bachelor in Computer Engineering

2019 – 2024 | Cairo, Egypt

Modern Academy For Engineering And Technology 

GPA: 3.41 (Ranked 4th in Cohort)

Graduation Project: Grade A+

WORK EXPERIENCE

Fullstack Web Developer

Nov 2024 – present | Alex, Egypt

Teradeveloper 

Full Time - Remotely

- Develop and maintain back-end system using Laravel, integrating with Angular front-end apps.

PROJECTS

Multi-Vendor E-commerce API [↗](#)

Sep 2024

Multi-Vendor eCommerce API is a robust platform for managing multi-vendor eCommerce operations. It features secure OAuth JWT authentication, Google OAuth integration, and Paymob for payment processing. Vendors can easily manage products, orders, and payments, while customers enjoy seamless browsing, ordering, and secure checkout with OTP verification. The API supports multi-role access, multi-language functionality, and caching for optimized performance. Fully documented with Swagger providing flexible, scalable solution for modern eCommerce platforms.

• Technologies Used: *Laravel, API, MYSQL, Passport, Swagger, Postman*

Brain Tumor Detection (BTD) [↗](#)

Aug 2024

BTD is an advanced web application designed to revolutionize brain tumor detections. Featuring multi-authentication capabilities, it ensures secure user access. Administrators have robust control, overseeing hospitals, doctors, tumor data, and treatment plans. Users can effortlessly schedule appointments and generate comprehensive reports. The platform also offers seamless clinic and schedule management for doctors, optimizing their workflows. At its core, BTD leverages cutting-edge AI and deep learning models to accurately detect and recognize brain tumors from medical images, enhancing diagnostic precision and efficiency.

• Technologies Used: *Laravel, Livewire, Mysql, HTML, CSS, JavaScript, Jquery, Python, Flask, Opencv.*

KASHIER [↗](#)

Jul 2024

Cashier is a comprehensive web-based application designed to manage employee authentication and billing within an organizational environment. The core functionality of Cashier revolves around providing a smooth and efficient workflow for employees and financial processes.

• Technologies Used: *Laravel, Livewire, Docker, Mysql, HTML, CSS, JavaScript, Jquery, Bootstrap.*
